

MAP BUILDER

EMI
NEN
CE.

HOW TO BUILD A LOCATION:

1. CREATE A CUSTOM BOARD (OBJECTS -> COMPONENTS -> BOARDS), UPLOAD AN IMAGE TO IT, THIS WILL BE OUR BASE. NEXT, DETERMINE THE SIZE OF THE FUTURE MAP, THE MOST CONVENIENT WAY TO DO THIS IS USING THE GIZMO TOOL. MAKE SURE THAT THE BASE DOES NOT EXTEND BEYOND THE LIMITS INDICATED ON THE TABLE.
2. TAKE THE 3D MODELS WE NEED ON THE LEFT, COPY THEM AND PASTE THEM ON THE BOARD. YOU CAN ALSO USE YOUR OWN PROPS IF YOU ARE SURE THAT THEY WILL BE LOADED BY THE OTHER GAMERS. BE SURE TO FASTEN (RIGHT CLICKING ON THE OBJECT -> TOGGLES -> LOCK). THEN THEY CAN BE MOVED WITH THE HELP OF THE IRREPLACEABLE GIZMO. IF YOU ARE BUILDING A MAP FOR EMINENCE, YOU NEED A CERTAIN SCALE. THERE ARE SEVERAL FIGURES OF PLAYERS WITH THE RIGHT SIZE ON THE DESK, FOCUS ON THEM.
3. WHEN THE LOCATION IS COMPLETED, CLICK THE SAVE LOCATION BUTTON (YOU MUST SIT ON THE BLACK SLOT). THEN THE RESULTING TAG CAN BE TRANSFERRED TO YOUR DESK.

HOW TO ADD A MAP TO THE EMINENCE MAIN TABLE:

1. TAKE SOME SCREENSHOTS.
2. SAVE THE LOCATION TOKEN TO YOUR COMPUTER (RIGHT CLICKING -> SAVE OBJECT). IT WILL BE STORED IN DOCUMENTS\MY GAMES\TABLETOP SIMULATOR\SAVES\SAVED OBJECTS\ NAME.JSON
3. SEND WHAT YOU MADE TO US IN DISCORD (SCREENSHOTS AND A JSON FILE), AND IF WE LIKE IT, WE WILL ADD IT TO THE MAIN TABLE, INDICATING YOUR AUTHORSHIP.

HOW TO USE A READY-MADE LOCATION:

1. TO SPAWN A LOCATION, CLICK THE RIGHT MOUSE BUTTON ON IT -> CREATE LOCATION.
2. IF YOU WANT TO CHANGE OR ADD SOMETHING (FOR EXAMPLE, PLACE THE NPCs IN ADVANCE), YOU CAN DO IT, AND THEN CHOOSE UPDATE LOCATION BY RIGHT CLICKING.
3. TO COMPLETELY REMOVE THE LOCATION, CLICK ON THE TRASH CAN ICON ON THE CENTRAL PANEL.
4. IF FOR SOME REASON THE LOCATION IS NOT LOADING, CLICK ON THE THIRD BUTTON, WHICH WILL RE-LINK ALL AVAILABLE TAGS WITH LOCATIONS.

HOW TO IMPLEMENT MAP BUILDER TO YOUR DESK:

1. FIRST WE NEED A SCRIPTING ZONE. IT SHOULD BE PLACED IN THE PLACE WHERE WE SHOULD HAVE A LOCATION. AFTER THE FIRST OPERATION OF THE SCRIPT, IT WILL BE PLACED LOWER AUTOMATICALLY. IF YOU NEED TO CORRECT THE ZONE, JUST RETURN IT TO THE TOP BY THE GIZMO TOOL AND ADJUST IT ACCORDING TO YOUR NEEDS.
2. NEXT, WE NEED TO TAKE THE ZONE GUID (THE ZONE -> SCRIPTING -> LEFT CLICKING ON IT) AND ADD IT TO THE GM (GAME MASTER) NOTES OF THE MAIN PANEL. THAT'S IT, YOU CAN USE IT.
3. IF THE SCRIPT TAKES EXTRA OBJECTS, YOU NEED TO PUT THE JLS_TABLE TAG ON THEM.

NOTE:

1. ANY MANIPULATIONS WITH THE LOCATION CAN ONLY BE CARRIED OUT BY THE GAME MASTER (THE PLAYER ON THE BLACK SLOT).
2. BOTH THE LOCATION ITSELF AND THE MAIN PANEL WITH THE SCRIPT ARE NEEDED TO OPERATE THE BUILDER MAP.
3. DO NOT CHANGE OR DELETE TAGS AND GM NOTES AND LOCATION TAGS.
4. MAP BUILDER BUILDS A LOCATION IN THE SAME PLACE WHERE HE SAVED IT, REGARDLESS OF THE POSITION OF THE PANEL.
